LIGHTING UP OUR LIVES

FIRST WE HAD THE LED REVOLUTION, THEN COLOUR TEMPERATURE CAME ALONG. NOW, KITCHEN LIGHTING HAS GONE ULTRA-FUNCTIONAL: DIVIDING AND UNITING, WARMLY HIGHLIGHTING OR ADDING A SUBTLE HINT OF DRAMA. INTRODUCING A SMART AND AT TIMES SURPRISING NEW PLAYER IN THE KITCHEN

EUROMOBIL

The **Antis** kitchen, with base units in super matt Mud lacquerwork and Inalco MDI worktop, is completed with new elements that make the kitchen equipment immediately usable. Standing on the top is the Ambrogio storage unit: glasses and small appliances are just visible through the translucent fabric front, which has a power-operated roll-up mechanism. Alongside, the Motus slider in black anodised aluminium with open compartments is mounted to a track on the back panel so that it can move horizontally to wherever it is needed. An attract visual effect and full visibility are ensured also in the worktop area because the smoked glass wall units are fitted with Dual Color lighting that have a colour temperature of 3000 K and 4000 K. In the island unit, finally, the Rondò snack bar and Space module organise on two levels everything needed for kitchen work.

NEW DESIGN
 The kitchen is a place where life happens. It is a place where we spend our time, where we meet, where we relax, where we work. It is a place where we create memories, where we share our lives. The kitchen is a place where we can be ourselves, where we can be happy. The kitchen is a place where we can be creative, where we can be innovative. The kitchen is a place where we can be smart, where we can be intelligent. The kitchen is a place where we can be beautiful, where we can be elegant. The kitchen is a place where we can be everything we want to be.

EUROMOBIL

La cucina **Antis**, con basi in laccato super matt Fango e piano top Inalco MDI, si completa con nuovi elementi che rendono subito fruibili gli strumenti di lavoro. In appoggio sul top ecco il contenitore Ambrogio; bicchieri e piccoli elettrodomestici si intravedono attraverso la chiusura traslucida in tessuto, avvolgibile e motorizzata. Accanto, lo scorrevole Motus in alluminio anodizzato nero con vani a giorno, che grazie al binario sullo schienale, si muove in orizzontale diventando così accessibile in qualsiasi punto. Per un effetto scenografico e per garantire la massima visibilità anche sul top, i pensili in vetro fumé integrano luci Dual Color con temperatura colore di 3000 K e di 4000 K. Infine, sull'isola, lo snack Rondò e il modulo Space, che organizza su due livelli quel che serve sull'area operativa.

LUCI ALLA RIBALTA

DOPO LA RIVOLUZIONE DEI LED E L'UTILIZZO DELLA TEMPERATURA COLORE, L'ILLUMINAZIONE IN CUCINA SUPPORTA LE FUNZIONI, DIVIDE E CONDIVIDE, DISEGNA E SCALDA, NASCONDE ED EVIDENZIA, TEATRALIZZA E SINTETIZZA. **PIÙ CHE INTELLIGENTI, SORPRENDENTI PROTAGONISTE**

TRUE DESIGN

The kitchen is a place where life happens. It is a place where we spend our time, where we meet, where we relax, where we work. It is a place where we create memories, where we share our lives. The kitchen is a place where we can be ourselves, where we can be happy. The kitchen is a place where we can be creative, where we can be innovative. The kitchen is a place where we can be smart, where we can be intelligent. The kitchen is a place where we can be beautiful, where we can be elegant. The kitchen is a place where we can be everything we want to be.
